Connect the Charging Cradle

Connect the Charging Cradle power adapter to the bottom of the Charging Cradle and to the electrical wall outlet.

Charge the Handset

Place the Handset in the Charging Cradle. When properly seated on the cradle, the amber light on the front of the cradle will be illuminated.

1. Immediately place the Handset in the Charging Cradle that came packed with the Handset. THE HANDSET MUST BE CHARGED FOR AT LEAST 30 MINUTES PRIOR TO ATTEMPTING ANY SECURITY SYSTEM INSTALLATION. IT MUST BE CHARGED FOR 2 HOURS BEFORE MAKING PHONE CALLS.

NOTE: The phone system comes with various settings pre-defined from the factory. Should you want to change these settings, we suggest waiting until after you activate your system. These settings include ring tones, ring volume, distinctive ringing, display contrast, etc.

Add the Handset to Your LifeShield System

Follow these steps for adding an additional Handset to a LifeShield system. Handsets packed with kits are pre-registered and do not require these steps.

After the initial installation of the LifeShield System, devices may be added to enhance access or performance.

The maximum number of devices that can be added to a LifeShield System is shown in the table to the right.

After the Handset and Charger are installed, use a Handset or Console that is already registered on the System to add the new Handset.
